Meet NIC

Your Trusted Partner

Since **2024**, our **IT and IoT consultancy** company has been dedicated to designing and implementing technology architectures tailored to the specific needs of your organization. We strive to create a positive technological impact on both people and the planet by simplifying processes for individuals and businesses alike.

Built to Lead

Nasser Solayman

is the founder of The Company, which is **established in 2024** with a vision to **revolutionize the [Information Technology services]**. With a passion for innovation and a drive to succeed, Nasser turned his idea into a reality, and the company has since grown into a beginner player in the market.

"Established a solo consultancy practice in 2018, offering bespoke services to clients and partnering with contractors as needed to deliver customized solutions aligned with project specifications."

"Building on our success in Egypt, we have initiated a strategic expansion into the UAE market since 2024. Our growth plans are guided by our capabilities, project scope, and a commitment to delivering exceptional results in our targeted markets."

Mission

To deliver cutting-edge IT and IoT consultancy services that empower businesses to optimize their technology infrastructure. By providing strategic solutions tailored to clients' needs, we enable organizations to enhance efficiency, security, and digital transformation.

Vision

To establish ourselves as a world-class consultancy firm, driving innovation in IT and IoT by leveraging expertise, strategic partnerships, and advanced technology solutions to shape the future of digital enterprises.
